

GYPCEIL PERFORATED SYSTEM - L

Acoustics Performance

These measurements meet the requirements of ISO 354. All measurements were carried out on standard boards with acoustic tissue laminated on the back.

The construction height specifies the distance between the undersides of the suspended ceiling and the existing construction.

The board's sound absorption is affected by the construction height and by any mineral wool installed behind them.

Product description

Modular size	1200x2400x12.5mm
Hole size	6x80mm
Perforated area	13%

Surface

Painting is done on site after filling the joints. The boards are painted with a short hair roller.

Technical data

Acoustic performance
NRC=0.73

Advantage

Four tapered edges help with quick and easy jointing and aesthetics.
